Re: File No. 2199-9197 NPDES No. LAD028401

Dear Mr. Dierker;

This letter is intended to serve as our monthly report for December 1984.

Since our last transmittal dated November 1984, there has not been sufficient rainfall to produce any storm-water run-off from our premises.

Perimeter checks of the premises are conducted daily at approximately 6:00 am and 2:30 pm every working day. Any minor spills or drips are cleaned up in a routine manner.

We are enclosing a land observation log covering the daily perimeter inspections, along with a sketch showing the location of the sampling stations.

I hereby certify under penalty of perjury, that to the best of my knowledge and belief, the above information is true and accurate.

Sincerely,

Ron W. Hagan Plant Manager
